

How's your cover?

Insurance protection

What Insurance protection do I need to cover any potential fire related costs, losses and liabilities?

You need to consider:

- 1 Insurance of property for loss and replacement from fire:**
For your house, household effects, other buildings, vehicles, plant and machinery, forests and crops.
- 2 Public Liability Insurance:**
To cover the cost of damage and loss to a third party from anything (including fire) that escapes from your property and damages other parties property.
- 3 Forest & Rural Fires Act fire suppression Insurance:**
To cover the costs of fire suppression from a fire caused by you or started on your property. Cover is required under Section 43, 46 and 46A of the Forest & Rural Fires Act 1977.
